

TRINITYHOUSE PRE-PRIMARY LITTLE FALLS

Global Citizenship forms an integral part of our daily lessons. Pupils are taught from an early age about Respect, Diversity and Inclusion. All our Grade 000 pupils were given a gemstone to demonstrate how every gemstone is different, yet one is not better or more special than the other.

When we introduce a new Inquiry to our pupils, we 'wow' or 'shock' them. This is all presented in a fun and exciting way to encourage the children to share their thoughts and experiences with the rest of the class. One of our exciting 'wow' tools is a mind map.

The building blocks of good Math skills start with number sense. Little children learn to recognise the shape of the number and the value and formation of each number. We apply Maths in all areas of our lives.

The bush babies have had such fun doing a 'Dancing Milk' science experiment using milk, food colouring and sunlight soap. They have also been practising fine motor skills by placing multicoloured beads onto a piece of string. They also did a Show & Tell about their pets and use their hands and feet to create cats and dogs with paint.

For the school's first OPD day in January 2021, pupils did a collection for Cotlands, a non-profit organisation that aims to help create a more equal and prosperous society by giving its vulnerable children the advantage.

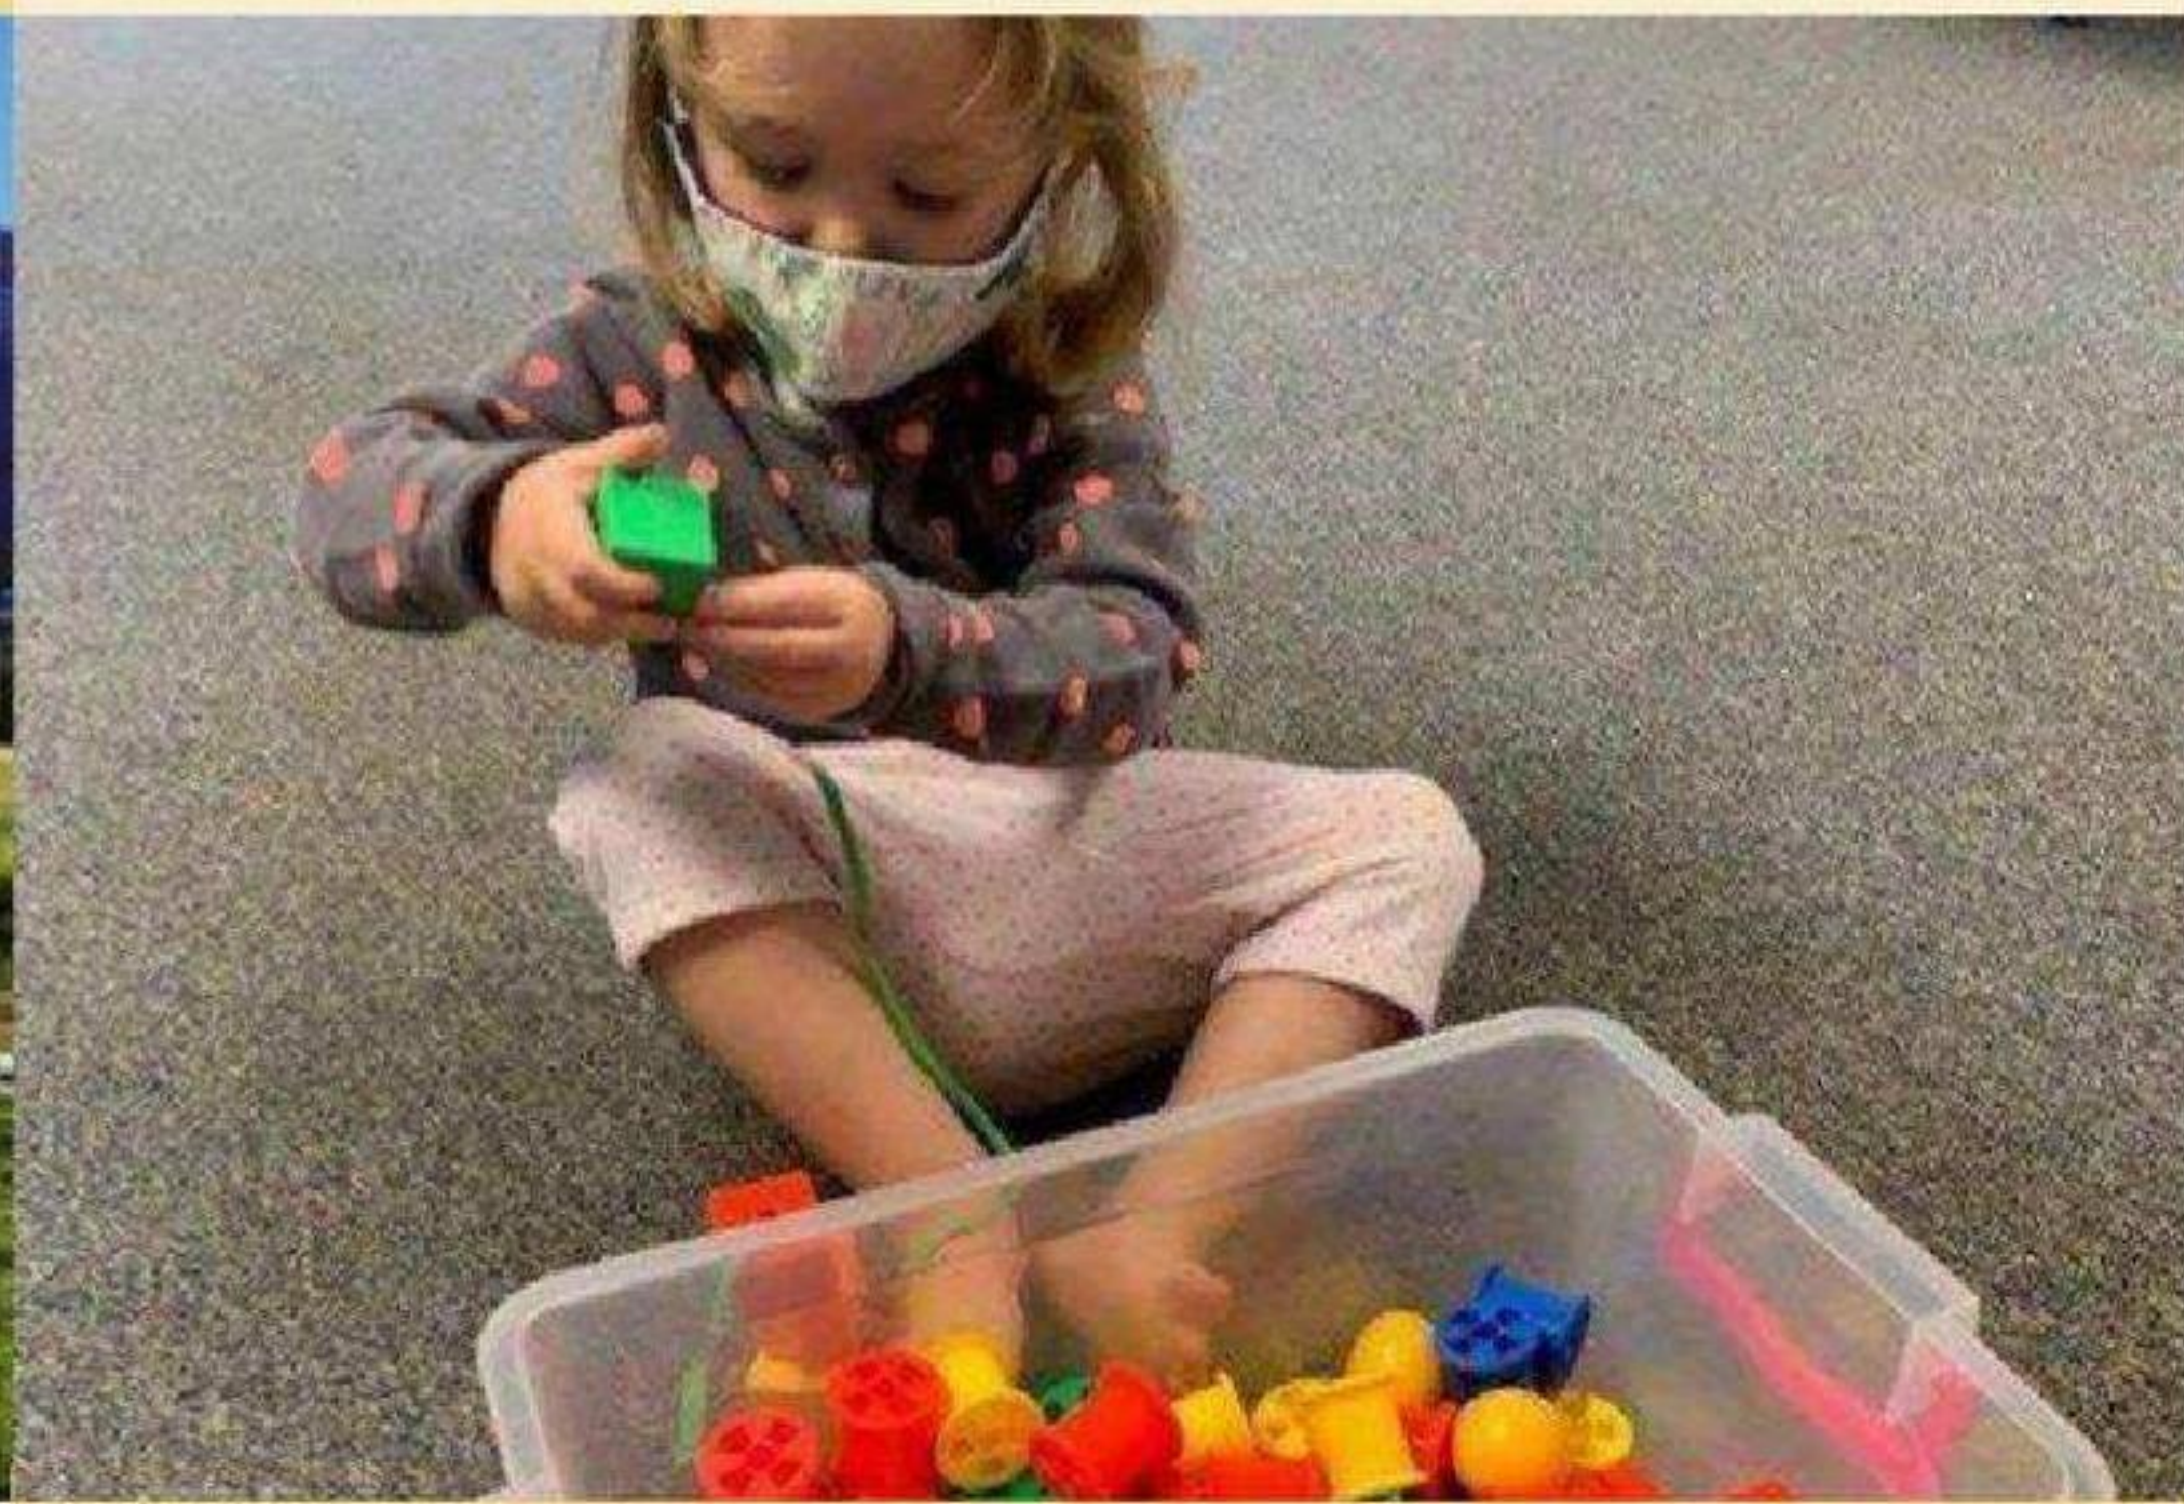

On 6 March 2021, our beautiful campus hosts an Open Day to showcase the true Trinitonian experience. Our school was beautifully decorated, and we welcomed many prospective families to our school.

Our Grade 0 classes explored the basic principles of respecting one another. They all decided on and agreed to 5 promises to each other and "shook hands" through their handprints.

Roary, our school mascot, entertained and waved at our parents and small friends at our schools' intersection.

Our little ones had such fun exploring different shapes, sizes and colours by stringing beads in class. This simple activity results in learning through play.
